

Marldon Close

Residential Landscape

Marldon Close is situated on the outskirts of Nottingham City Centre where Hosta Consulting provided a landscaping scheme. This development was designed, project managed and installed by Hosta Consulting for Nottingham City Homes.

The un-utilised area was a space mostly covered by mossy tarmac and patchy grass verges. The Close was improved with the construction of raised wooden sleeper beds. Smart mixed low maintenance planting was added to the beds to brighten up the entrances to the houses, whilst the verges were replaced with a vibrant wildflower meadow.

The scheme is low maintenance, yet provides residents with the opportunity to take ownership of their newly installed plots, and has improved the biodiversity of the area.
